## - Profile

Front-End Developer skilled in building responsive and user-friendly web applications using React.js, Tailwind CSS, Zustand, Axios, and React Query. Developed multiple real-world training projects with integration to both mock and real back-end services. Passionate about clean UI, user experience, and continuous learning.

## - Skills

- HTML - CSS - Tailwind CSS - JavaScript - React.js - React Query - Zustand - Axios - Fetch API - Git & GitHub

## - Soft Skills

- Communication - Teamwork - Problem Solving - Time Management - Adaptability

## - Projects

### E-commerce Web Application

Built a fully functional e-commerce platform using React, Tailwind CSS, and React Query. Developed multiple versions using different state and data management approaches: one with Context API and Fetch integrated with a mock back-end, and another with Zustand and Axios connected to a real API. Includes product browsing, cart, checkout, authentication, and secure payment via Stripe.

### Admin Dashboard

Developed an interactive and responsive admin dashboard for managing users, products, and analytics. Used React, Zustand, Tailwind CSS, and Axios. Included real-time data visualization and role-based access control. Integrated with a Back-End system.

### Hotel & Flight Booking Website

Created a dynamic booking platform using React, Tailwind CSS, Zustand, Axios, with mock back-end integration. Features include search, filtering, booking flow, and confirmation system.

### Restaurant Reservation System

Developed a complete restaurant reservation system using React, Tailwind CSS, Zustand, Axios, and integrated with a real Back-End. Included table selection, reservation management, and user authentication.
